

The Traveller

The Traveller is a new generation piston powered twin engine, high wing, fixed landing gear aircraft.

Despite being a small aircraft, the little add-ons such as in seat power, air-conditioning, decent leg room and under seat storage adds to the comforts of travelling in style.

The modern cutting edge avionics afforded by the Garmin suite 1000xi, provides the pilots with all the information they require both in day and night operations, making night operations to equipped airfields another key factor in the choice of aircraft.

The Traveller comes to re-enforce Zil Air's commitment to safety and continued safe operations, be it for our customers and employees alike. We remain committed to the safest aviation operating standards and your safety is above all paramount to us.

Passenger

The Traveller's large cabin accommodates up to 11 seats (with a maximum of 9 passengers). Infants aged 1 day to 23 months can be seated on parent's laps. Children over the age of 2 must occupy their own seat under adult supervision.

Luggage

The Traveller can take up to a total weight of 340kg in the dedicated luggage compartment.

Please refer to the 'Available Payload Chart'.

Specifications

Capacity:	11 (incl 2 pilots)
Length:	11.8m
Height:	4.4m
Propeller diameter:	1.95m
Fuel tank capacity:	750 Litres
Maximum take-on weight:	3600kg

Performance

Maximum Speed:	
Cruise Speed:	320km/h
Maximum Engine Power:	375Hp (each)
Range:	700NM
Service Ceiling:	10,000ft
Rate of Climb:	6.35m/s
Number in fleet :	1
